PROJECTS

TODO-LIST

Created a responsive web application using Visual Studio Code technology and writing it in HTML, SCSS, JavaScript language. Also, using Webpack through Node Package Manager (NPM) to add date-fns library and scss loader to the said project. the data is stored in web local storage.

CREATE RESUME

Created using create-react-app which is Node Packet Manager (NPM) package. It setup a Reactjs work environment for the developer. coding it with Visual Studio Code IDE. Also, using a PDF and html2canva to convert the HTML element to image then image to PDF. The user can download a resume that they created using my web application. The web application designed being user friendly. Thus, the application can be use by a computer literate user or not.
